Dear Mr Celestino Ko,

Over the past years since early 2005 our business relationship has grown tremendously, you have provided extremely good personnel with all the qualifications and experience required to satisfy our clients, as and when we required them.

Our outstanding safety record has continued to shine with the help of Jai-Kin personnel.

The recent deployment of more than 65 x temporary mechanical technicians to support our shutdown activities at Oryx GTL plant and Qatar Gas, has been an incredible success, the feed back from our clients is nothing short of spectacular.

All Jai-kin personnel were smartly presented, very willing to work and followed all safety requirements to the fullest, I would like you pass on my appreciation to all concerned.

Rest assured we will be continuing to use your services and hopefully expand our business even further to the benefit of both our companies.

As you will no doubt be aware our business is expanding at a rate that has even amazed my own expectations, we intend to start brand new operations in Oman before the end of 2010 and Saudi Arabia in 2011, we will certainly require your help to up and down man to suit our operations in these areas.

The ability to increase and decrease our manpower to suit our workload is extremely cost effective and helps us to keep a much tighter control on overheads, which obviously leads to higher profits.

On behalf of SRQ Qatar and RBG International, I thank you for your valued support and look forward to working with you as always.

Yours sincerely

Gary Coughlan
Middle East Operations Manager
